# DEVELOPING TOMORROW'S VISIONS TODAY...

Technical know-how, flexibility and short lead times make EA the preferred supplier for well-known companies and institutes.

## HIGH POWER ELECTRONICS MADE IN GERMANY

EA-Elektro-Automatik LLC is Germany's leading manufacturer of laboratory power supplies, high performance mains units and electronic loads. EA-Elektro-Automatik was founded in 1974 by Helmut Nolden with the vision of developing high quality power supplies for all applications. Today EA-Elektro-Automatik is a modern medium-sized enterprise.

Approximately 250 employees research, develop and manufacture at the ca. 11.500 m<sup>2</sup> (123,785 sqft) main site in Viersen. With the aid of an extensive dealer network, high-tech technology from Niederrhein is delivered globally.

## INNOVATION THROUGH R & D

Innovation is of major significance at EA. We are passionate in our development and production of laboratory and high performance power supplies as well as electronic loads, which set standards for functionality, flexibility and reliability. The results of more than four decades research and development flow directly into new products. With the introduction of flexible output stages in laboratory power supplies and energy recovery from electronic loads we are pioneers of new technologies.

## SWITCHED ON: DEVELOPMENT COMPETENCE OF THE HIGHEST LEVEL

Concept, design, technical development and specification of our power supply systems is carried out in-house as a matter of principle. In this way the technical advances made by our development team can be incorporated directly in finished products. Thus our engineers look not only at the market requirements of today but develop solutions for the technical challenges of tomorrow.

## ENERGIZED: SHORT TIME-TO-MARKET

Development cycles for new systems are getting shorter. Technological excellence means that we must have flexible production processes so that we can answer short term production-specific customer demands. We guarantee our customers rapid reaction in the event of an emergency.

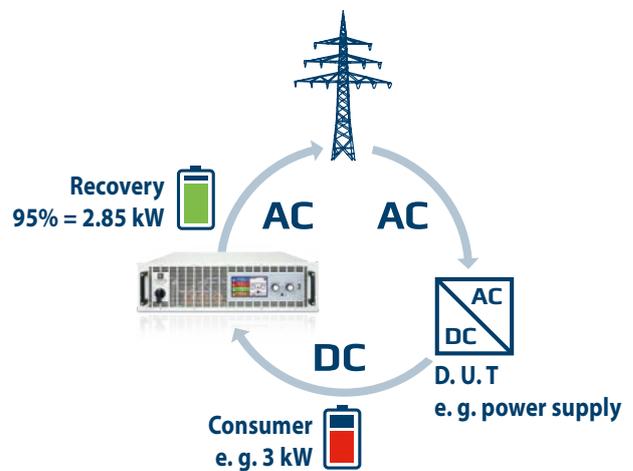

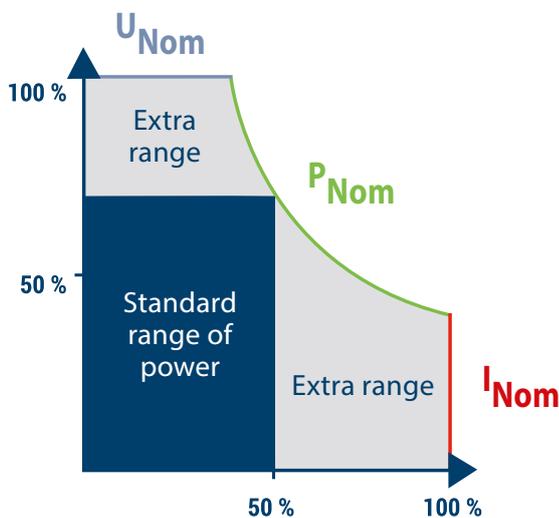

# TECHNOLOGICAL LEADERSHIP

## COMPETENCE IN TESTING AT OUR OWN LABORATORIES

All EMC measurements and safety related tests are carried out in our in-house testing laboratories. Furthermore, our high-tech devices are TÜV certified to the safety requires of EN 61010-1 and EMI proof according EN 61000-6-3 class B. During the manufacturing process the incorporated modules and building blocks are tested with an automatic test adapter. Subsequently a computer controlled test system calibrates and performs tests for function and all quality relevant parameters.

All test and calibration data are recorded and can be retrieved. Following final control all devices undergo a "burn-in test" under maximum load. These are carried out at an ambient temperature of 40°C using an electronic load with energy feedback. Thus the power consumed in the test is not released as heat but rather fed back into the domestic power supply.

Auto-range principle

Circular energy flow when using recovering devices

#### PROXIMITY TO CUSTOMERS

We maintain close contact with our customers. Thus we understand their needs. The high level of technical know-how of our associates enable us to deliver power supply units and systems which exactly meet customer requirements. Our highly specialized team are developing innovative solutions today for the technical demands of tomorrow.

#### FOCUS ON NEW TECHNOLOGY

When it comes to introducing new technologies EA is the leader in its sector. Laboratory power supplies with an auto-ranging feature of a flexible output stage and electronic loads with energy recovery were both the brainchild of EA. Color TFT touch screens for intuitive operation of laboratory power supplies also have their origin at EA.

#### CUSTOM MADE: PRODUCTS AND SUPPORT

Whether in the laboratory, industry or training, EA offers a wide and deep product spectrum for virtually any application: laboratory and industry power supplies, as well as electronic loads for laboratory desktop applications or 19" plug-in systems. Based on these standard programs we also develop custom built equipment and systems to meet your requirements. A specific attribute is that all our products have an optimized energy usage by reaching an above average efficiency of up to 95%. In addition, our EA team of highly specialized technology experts are there to help with all issues around power supply units and electronic loads.

#### QUALITY IS OUR STANDARD

A quality management system certified to DIN ISO 9001-2015 ensures that processes in all phases of the value chain are documented. This leads to the high technical reliability of our power supply equipment and electronic loads. We guarantee a continuous high quality, from goods receipt through all manufacturing steps to final inspection.

#### WELL PREPARED: VIEWING THE FUTURE

With manufacturing sites in Germany and the Far East, EA is well prepared for the future. The signs are set for expansion: technical know-how, flexibility and short lead times make us a globally preferred supplier of well-known companies and institutes.

#### EA BATTERY SIMULATOR AND EA POWER CONTROL

In order to support end users of EA products in their hardware-in-the-loop (HIL) tests zu, EA has developed the EA Battery Simulator in cooperation with the renowned Fraunhofer Institute. This smart software is compatible to the power supply series EA-PSB 9000 and EA-PSB 10000 and offers extensive battery simulation features.

The Windows software EA Power Control furthermore simplifies remote control of all device series which have been developed since 2012. The optional application "Multi Control" allows for the management and control of up to 20 EA devices at once from one PC, with all their functions available at one glance.

## Programmable DC-Power Supply

## Features

- Wide range input, 110 V - 240 V  $\pm$ 10 % 1ph AC
- Active Power-Factor-Correction, typical 0.99
- Very high efficiency up to over 95 %
- Voltage from 0 - 60 V up to 0 - 1500 V
- Currents from 0 - 6 A up to 0 - 120 A
- Flexible power regulated DC output stages (autoranging)
- Regulation mode CV, CC, CP, CR with fast crossover
- Digital regulation, high resolution with 16bit ADCs and DACs, selection of control speed: Normal, Fast, Slow
- Color 5" TFT display with touch control and intuitive user interface
- Galvanically isolated Share-Bus for parallel operation of all power classes in the 10000 series
- Master-Slave bus for parallel operation of up to 64 units of all power classes in the 10000 series
- Integrated function generator with predefined curves
- Predefined automotive test procedures for LV123, LV124 and LV148
- Command languages and drivers: SCPI and ModBus, LabVIEW, IVI

## Build-in Interfaces

- USB
- Ethernet
- Analog
- USB Host
- Master-Slave-Bus
- Share-Bus

## Optional Interfaces

- CAN
- CANopen
- RS232
- Profibus
- EtherCAT
- Profinet, with one or two ports
- Modbus, with one or two ports
- Ethernet, with one or two ports

## Programmable Bidirectional DC-Power Supply

### Features

- Wide range input, 110 V - 240 V  $\pm$ 10 % 1ph AC
- Active Power-Factor-Correction, typical 0.99
- Bidirectional power supply, 2-quadrants in source and sink
- In load operation, regenerative with energy recovery into the grid
- Very high efficiency up to over 95 %
- Voltage from 0 - 10 V up to 0 - 1500 V
- Currents from 0 - 6 A up to 0 - 120 A
- Flexible power regulated DC input/output stages (autoranging)
- Regulation mode CV, CC, CP, CR with fast crossover
- Digital regulation, high resolution with 16bit ADCs and DACs
- Color 5" TFT display with touch control and intuitive user interface
- Galvanically isolated Share-Bus for parallel operation of all power classes in the 10000 series
- Master-Slave bus for parallel operation of up to 64 units of all power classes in the 10000 series
- Integrated function generator with predefined curves
- Predefined automotive test procedures for LV123, LV124 and LV148
- Integrated battery test mode, battery and fuel cell simulation
- Photovoltaics test mode, MPPT, EN 50530
- Command languages and drivers: SCPI and ModBus, LabVIEW, IVI

### Build-in Interfaces

- USB
- Ethernet
- Analog
- USB Host
- Master-Slave-Bus
- Share-Bus

### Optional Interfaces

- CAN
- CANopen
- RS232
- Profibus
- EtherCAT
- Profinet, with one or two ports
- Modbus, with one or two ports
- Ethernet, with one or two ports

### Software

- EA-Power Control
- EA-Battery Simulator

## 5 KW - 10 KW - 15 KW

### Programmable Bidirectional DC-Power Supply

## Features

- Wide range input, 208 V - 480 V  $\pm$ 10 % 3ph AC
- Active Power-Factor-Correction, typical 0.99
- Bidirectional power supply, 2-quadrants in source and sink
- In load operation, regenerative with energy recovery into the grid
- Very high efficiency up to over 96 %
- High performance of up to 15 kW per unit
- Voltage from 0 - 10 V up to 0 - 2000 V
- Currents from 0 - 20 A up to 0 - 510 A
- Flexible power regulated DC input/output stages (autoranging)
- Regulation mode CV, CC, CP, CR with fast crossover
- Digital regulation, high resolution with 16bit ADCs and DACs, selection of control speed: Normal, Fast, Slow
- Color 5" TFT display with touch control and intuitive user interface
- Galvanically isolated Share-Bus for parallel operation of all power classes in the 10000 series
- Master-Slave bus for parallel operation of up to 64 units of all power classes in the 10000 series
- Integrated function generator with predefined curves
- Predefined automotive test procedures for LV123, LV124 and LV148
- Integrated battery test mode, battery and fuel cell simulation
- Photovoltaics test mode, MPPT, EN 50530
- Command languages and drivers: SCPI and ModBus, LabVIEW, IVI

## Programmable Bidirectional DC Power Supply

### Features

- Wide range input, 208 V - 480 V  $\pm$ 10 % 3ph AC
- Active Power Factor Correction, typical 0.99
- Bidirectional power supply, 2-quadrants in source and sink
- In load operation, regenerative with energy recovery into the grid
- Very high efficiency up to over 96 %
- High performance of 30 kW per unit
- Voltage from 0 - 10 V up to 0 - 2000 V
- Currents from 0 - 40 A up to 0 - 1000 A
- Flexible power regulated DC -input/output stages (autoranging)
- Regulation mode CV, CC, CP, CR with fast crossover
- Digital regulation, high resolution with 16bit ADCs and DACs, selection of control speed: Normal, Fast, Slow
- Color 5" TFT display with touch control and intuitive user interface
- Galvanically isolated Share-Bus for parallel operation of all power classes in the 10000 series
- Master-Slave-Bus for parallel operation of up to 64 units of all power classes in the 10000 series
- Integrated function generator with predefined curves
- Predefined automotive test procedures for LV123, LV124 and LV148
- Integrated battery test mode, battery and fuel cell simulation
- Photovoltaics test mode, MPPT, EN 50530
- Command languages and drivers: SCPI and ModBus, LabVIEW, IVI

### Build-in Interfaces

- USB
- Ethernet
- Analog
- USB Host
- Master-Slave-Bus
- Share-Bus

### Optional Interfaces

- CAN
- CANopen
- RS232
- Profibus
- EtherCAT
- Profinet, with one or two ports
- Modbus, with one or two ports
- Ethernet, with one or two ports

### Software

- EA-Power Control
- EA-Battery Simulator

### Options

- Water Cooling in stainless steel

# HIGH RATING DC POWER SUPPLY SYSTEMS

## 30 KW - 120 KW IN 19" CABINETS

PSB 10000 24U

**U I P R OVP OCP OPP OTP USB LAN**

- For 380 V, 400 V and 480 V supply
- Flexible power stage
- 60 V models for SELV
- With bidirectional power supplies with energy recovery (PSB) or standard power supplies (PSI)
- Intuitive handling due to multi-language color TFT touch panel
- Extensive function generator
- For photovoltaics, battery and fuel cell tests
- Master-slave feature (PSI)
- Protective features (OVP, OCP, OT...)
- Plug&Play slot for digital interfaces
- All interfaces galvanically isolated
- Optional: water cooling
- Optional: grid protection <sup>(1)</sup> plus emergency stop
- Optional: emergency stop without grid protection
- Remote control software EA Power Control
- LabVIEW VI package
- IVI driver support
- SCPI and ModBus protocol
- 19" cabinet in 24 U
- Extendable to 4 units per cabinet

(1) Grid protection device for backfeeding installations according to VDE AR-N 4105

# HIGH RATING DC POWER SUPPLY SYSTEMS UP TO 1920 KW IN 19" CABINETS

SYSTEM 960

**U I P R OVP OCP OPP OTP USB ...**

- For 380 V, 400 V and 480 V supply
  - With bidirectional power supplies with energy recovery (PSB 10000) or electronic loads with energy recovery (ELR 10000) or standard power supplies (PSI 10000)
  - Power ratings of up to 240 kW per cabinet
  - Master-Slave systems with up to 1920 kW
  - Voltage ratings of up to 2000 V per cabinet or system
  - Current ratings of up to 8000 A per cabinet
  - 60 V systems for SELV
  - Intuitive handling with multi-language color TFT touch panel
  - Extensive function generator
  - For photovoltaics, battery and fuel cell tests
  - Protective features (OVP, OCP, OT...)
  - USB, Ethernet and analog interface integrated
  - Plug&Play slot for digital interfaces
  - All interfaces galvanically isolated
  - Built according standard EN 60204-1 (machine safety)
- Various options:
    - Emergency stop circuit
    - Isometer (insulation guard)
    - Grid protection and supervision (for recovering devices)
    - Water cooling
  - 19" cabinets in 24 U or 42 U for following series:
    - PSB 10000
    - PSI 10000
    - ELR 10000

# EA-ELR 10000 2U 1.5 KW / 3.0 KW

Programmable Electronic DC-Loads  
With Energy Recovery

## Features

- Wide range input, 110 V - 240 V  $\pm 10\%$  1ph AC
- Active Power-Factor-Correction, typical 0.99
- Regenerative with energy recovery into the grid
- Very high efficiency up to over 95 %
- Voltage from 0 - 80 V up to 0 - 1500 V
- Currents from 0 - 6 A up to 0 - 120 A
- Flexible power regulated DC input stages (autoranging)
- Regulation mode CV, CC, CP, CR with fast crossover
- Digital regulation, high resolution with 16bit ADCs and DACs, selection of control speed: Normal, Fast, Slow
- Color 5" TFT display with touch control and intuitive user interface
- Galvanically isolated Share-Bus for parallel operation of all power classes in the 10000 series
- Master-Slave bus for parallel operation of up to 64 units of all power classes in the 10000 series
- Integrated function generator with predefined curves
- Integrated battery test mode
- Photovoltaics test mode, MPPT
- Command languages and drivers: SCPI and ModBus, LabVIEW, IVI

## Build-in Interfaces

- USB
- Ethernet
- Analog
- USB Host
- Master-Slave-Bus
- Share-Bus

## Optional Interfaces

- CAN
- CANopen
- RS232
- Profibus
- EtherCAT
- Profinet, with one or two ports
- Modbus, with one or two ports
- Ethernet, with one or two ports

## Software

- EA-Power Control

# EA-ELR 10000 3U

## 5 KW - 10 KW - 15 KW

Programmable Electronic DC-Loads  
With Energy Recovery

### Features

- Wide range input, 208 V - 480 V  $\pm 10\%$  3ph AC
- Active Power-Factor-Correction, typical 0.99
- Regenerative with energy recovery into the grid
- Very high efficiency up to over 96 %
- High performance of up to 15 kW per unit
- Voltage from 0 - 80 V up to 0 - 2000 V
- Currents from 0 - 20 A up to 0 - 510 A
- Flexible power regulated DC input stages (autoranging)
- Regulation mode CV, CC, CP, CR with fast crossover
- Digital regulation, high resolution with 16bit ADCs and DACs, selection of control speed: Normal, Fast, Slow
- Color 5" TFT display with touch control and intuitive user interface
- Galvanically isolated Share-Bus for parallel operation of all power classes in the 10000 series
- Master-Slave-Bus for parallel operation of up to 64 units of all power classes in the 10000 series
- Integrated function generator with predefined curves
- Integrated battery test mode
- Photovoltaics test mode, MPPT
- Command languages and drivers: SCPI and ModBus, LabVIEW, IVI

### Build-in Interfaces

- USB
- Ethernet
- Analog
- USB Host
- Master-Slave-Bus
- Share-Bus

### Optional Interfaces

- CAN
- CANopen
- RS232
- Profibus
- EtherCAT
- Profinet, with one or two ports
- Modbus, with one or two ports
- Ethernet, with one or two ports

### Software

- EA-Power Control

Elektro-Automatik

## LEADING-EDGE POWER ELECTRONICS MADE BY EA

Wide application spectrum. Technological excellence.

Global customer contact.

The EA Elektro-Automatik Group is Europe's leading supplier in the area of power electronics for R & D and industrial application. At the headquarters in Germany in the industrial center of North Rhine Westphalia, more than 300 qualified associates, research, develop and manufacture high-tech devices such as laboratory power supplies, high-power supplies and electronic loads with and without mains feedback..

### Development partner in forward looking industries

With leading edge technology and a broad application spectrum, EA has established itself as the development partner in forward looking industries. Our devices are used across industries – from battery and fuel cell technology, wind and solar energy, to electrochemicals processes, telecommunications and more.

### Automated quality assurance

Results and experience from decades of R & D flow continually into new solutions. Automatic test systems with specially developed soft- and hardware assure consistent high product quality. Flexible production processes support fast reaction to changing customer requirements.

### Global customer contact, value sharing

As a mid-size company, EA manufactures local in Germany but acts globally with branches in China and USA, sales office in Spain and a wide network of partners. Value sharing, mutual respect and open communication characterise our organization.

### Technological excellence is the demand of tomorrow

The foundation of the company in 1974 was based on innovation, a tradition which is maintained today. What started with the development of simple mains adaptors is continued today in the overall concept of technology leadership. With highly specialized power supply systems for a multitude of applications, EA is driving the future of power electronics – technologically excellent for high performance and designed for resource protection and energy saving.

## PURE & POWERFUL

### EA-10000 Industrial Series

60 kW in 6U.  
30 kW in 4U.  
Up to 300 kW  
in a single rack.

## EA-10000 INDUSTRIAL SERIES

### New power density

With the new EA-10000 Industrial series, EA Elektro-Automatik (EA) has achieved a breakthrough in power density. The motto: Pure & Powerful! Powerful performance with 60 kW in 6U, 30 kW in 4U and up to 300 kW in a single rack, combined with pure design without manual display on the front.

### Large product variety

The product variety includes a total of 50 models with the device types EA-PU 10000 programmable DC power supplies, EA-PUB 10000 programmable bidirectional power supplies and EA-PUL 10000 DC regenerative electronic loads.

### EA-10000 Industrial Series with 6U Power

21 models with 60 kW power

Power Unit	EA-PU 10000 6U
Power Unit Bidirectional	EA-PUB 10000 6U
Power Unit Load	EA-PUL 10000 6U

Model	Voltage	Current	Power
10360-480	0 – 360 V	0 – 480 A	0 – 60000 W
10500-360	0 – 500 V	0 – 360 A	0 – 60000 W
10750-240	0 – 750 V	0 – 240 A	0 – 60000 W
10920-250	0 – 920 V	0 – 250 A	0 – 60000 W
11000-160	0 – 1000 V	0 – 160 A	0 – 60000 W
11500-120	0 – 1500 V	0 – 120 A	0 – 60000 W
12000-80	0 – 2000 V	0 – 80 A	0 – 60000 W

### High safety, low operating costs

The new Industrial series combines high safety with low operating costs. All models feature overcurrent, overvoltage, overpower and overtemperature protection functions. The bidirectional power supplies and regenerative electronic loads have power factor correction of 0.99 and return up to over 96% of the absorbed power to the grid.

### Efficiency in development and testing

All devices work with the same firmware and have similar input and output characteristics. The common programming and user interface saves time when developing and setting up test and control systems that require multiple power units.

### EA-10000 Industrial Series with 4U Power

29 models with 30 kW power

Power Unit	EA-PU 10000 4U
Power Unit Bidirectional	EA-PUB 10000 4U
Power Unit Load	EA-PUL 10000 4U

Model	Voltage	Current	Power
10060-1000	0 – 60 V	0 – 1000 A	0 – 30000 W
10080-1000	0 – 80 V	0 – 1000 A	0 – 30000 W
10200-420	0 – 200 V	0 – 420 A	0 – 30000 W
10360-240	0 – 360 V	0 – 240 A	0 – 30000 W
10500-180	0 – 500 V	0 – 180 A	0 – 30000 W
10750-120	0 – 750 V	0 – 120 A	0 – 30000 W
10920-125	0 – 920 V	0 – 125 A	0 – 30000 W
11000-80	0 – 1000 V	0 – 80 A	0 – 30000 W
11500-60	0 – 1500 V	0 – 60 A	0 – 30000 W
12000-40	0 – 2000 V	0 – 40 A	0 – 30000 W

## POWERFUL FEATURES

- DC input/output with autoranging
- Digitally (FPGA) controlled DC input/output U – I – P – R
- Latest SiC technology
- LEDs in the front to indicate the device status
- Optional stainless steel water cooling system
- AC mains input with extended range (380 V – 480 V, 3ph AC)
- Built-in interfaces: Ethernet, USB, Analog
- Optional interfaces: CAN, CANopen, EtherCAT, RS232, Profibus, Profinet, Modbus, Ethernet
- Communication with PCs and PLCs
- SCPI or ModBus programming modes
- Galvanically isolated Share-Bus
- Master-Slave-Bus up to 64 participants of the EA-10000 series
- Integrated function generator with predefined curves

## FOR INDUSTRIAL APPLICATIONS

- For use in ATE systems and automated process control systems
- For testing batteries and fuel cells
- For simulations of batteries and solar systems
- For the complete discharge of batteries for recycling
- Reliable power supply for electrolysis plants
- As sustainable power electronics for aviation application

## HIGH-POWER RACKS

### Save equipment costs and rack space

Increased performance can reduce the number of power supplies needed for a high-performance system. This saves significant capital and operating costs as well as important rack space. Power is provided in a smaller footprint. In addition, the electronic loads operate regeneratively, with efficiencies up to over 96 %.

### Powerful rack performance

- A 19" rack with 42 U for a system with 300 kW
- One system with up to 13 racks with 64 units of 60 kW each
- For high power applications up to 3.84 MW

### Optionally available:

- Emergency stop (machine standard EN60204-1)
- Mains monitoring (ENS)
- Insulation monitor
- Copper busbar for DC output

# EA-BT 20000 TRIPLE

Battery Tester  
with regenerative energy recovery

## Features

- Wide range input: 208 V - 480 V,  $\pm 10\%$ , 3ph AC
- Active Power Factor Correction, typical 0.99
- Battery tester, 2-quadrants for charge and discharge
- In discharge operation regenerative with energy recovery into the grid
- Very high efficiency of up to over 96%
- Voltages from 0 - 10 V up to 0 - 920 V
- High performance with up to 10 kW per channel
- Currents from 0 - 40 A up to 0 - 600 A per channel
- Flexible power regulated DC output/input stages (autoranging)
- Regulation modes CV, CC, CP, CR with fast crossover
- Digital regulation, high resolution with 16bit ADCs and DACs, selection of control speed: Normal, Fast, Slow
- Galvanically isolated Share-Bus for parallel operation
- Master-Slave-Bus for parallel operation
- Built-in Interfaces with 1 ms communication speed
- Typical battery tester functionality integrated
- Integrated Battery test mode, battery simulation
- Command languages and drivers: SCPI and ModBus, LabVIEW, IVI

## Built-in interfaces

- USB
- Ethernet 1Gbit/s
- EtherCAT
- CAN FD
- Master-Slave-Bus
- Share-Bus
- USB Host on Front panel
- 3 digital inputs
- 3 relay contacts
- 3 temperature sensor inputs

## Software

- EA-Power Control
- EA-Battery Simulator

## Options

- Water Cooling in stainless steel

Technical specifications	BT 20010-400 Triple	BT 20010-600 Triple	BT 20060-340 Triple	BT 20080-340 Triple
<b>DC output per channel</b>				
Number of channels	3 channels	3 channels	3 channels	3 channels
Voltage range	0 - 10 V	0 - 10 V	0 - 60 V	0 - 80 V
Ripple in CV (rms)	≤25 mV (BW 300 kHz)	≤25 mV (BW 300 kHz)	≤25 mV (BW 300 kHz)	≤25 mV (BW 300 kHz)

## We are a global supplier

The EA supply chain covers the whole world. Our headquarters site and main research center is placed directly in the strategic heart of Europe, in Viersen.

There, and in our subsidiaries in Germany, China (Shanghai, Shenzhen, Hongkong), USA (San Diego) and Russia (Moscow), we employ approx. 250 members of staff. They all work to provide the optimal solutions to the requirements of each and every customer, now and in the future.
